

2K ANTICORROSIVE EPOXY PRIMER 4:1

High quality 2K epoxy primer with anticorrosive additives created to use specifically under Rangers 2K polyurethane coating.

Provides great anticorrosive protection for steel substrates, strengthens and prolongs anti-corrosion effect of Rangers 2K polyurethane coating.

Depending on the amount of thinner can be used as a filling primer (4+1+15%) or isolating primer (4+1+25%), with higher dilution suitable for application „wet on wet“ (4+1+50%).

- Perfect protection of steel surfaces.
- Very strong adhesion to different substrates.
- Excellent flow and easy application process.

Colour: **light grey**

Art. no: **15260**

Capacity: **0,8 l + 0,2 l**

Quantity per box: **6 sets**

EPOXY THINNER

Product dedicated for dilution of Rangers 2K anticorrosive epoxy primer.

Thinner for epoxy primer is a mixture of specially combined high quality organic solvents that allows to obtain a product with strictly defined parameters.

Provides proper application, levelling and curing.

Detailed ratios for each product are given in technical data sheets.

Art. no: **15287**

Capacity: **0,5 l**

Quantity per box: **6 pcs**
