

# HARDENER CLEAR COAT CRYSTAL SLOW

ECT	TON 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING
.1	Product identifier: HARDENER CLEAR COAT CRYSTAL SLOW
	Other means of identification:
	<b>UFI:</b> 6YDA-712D-D003-DYSE
L <b>.2</b>	Relevant identified uses of the substance or mixture and uses advised against:
	Relevant uses: Car repair; hardener for coatings. For professional users only.
	Uses advised against: All uses not specified in this section or in section 7.3
L.3	Details of the supplier of the safety data sheet:
	Troton Sp. z o.o. Ząbrowo 14A 78-120 Gościno - Zachodniopomorskie - Polska Phone: +48 94 35 123 94 - Fax: +48 94 35 126 22 troton@troton.com.pl www.troton.pl / www.troton.eu
1.4	Emergency telephone number: (8am-4pm)+48 094 35 123 94; 112
	TON 2: HAZARDS IDENTIFICATION
2.1	Classification of the substance or mixture:
	CLP Regulation (EC) No 1272/2008:
	Classification of this product has been carried out in accordance with CLP Regulation (EC) No 1272/2008. Acute Tox. 4: Acute inhalation toxicity, Category 4, H332
	Aquatic Chronic 3: Hazardous to the aquatic environment, long-term hazard, Category 3, H412 Flam. Liq. 3: Flammable liquids, Category 3, H226 Skin Irrit. 2: Skin irritation, Category 2, H315 Skin Sens. 1: Sensitisation, skin, Category 1, H317 STOT SE 3: Respiratory tract toxicity, single exposure, Category 3, H335
2.2	Label elements:
	CLP Regulation (EC) No 1272/2008: Warning
	Hazard statements:
	Acute Tox. 4: H332 - Harmful if inhaled. Aquatic Chronic 3: H412 - Harmful to aquatic life with long lasting effects. Flam. Liq. 3: H226 - Flammable liquid and vapour. Skin Irrit. 2: H315 - Causes skin irritation. Skin Sens. 1: H317 - May cause an allergic skin reaction. STOT SE 3: H335 - May cause respiratory irritation. <b>Precautionary statements:</b>
	<ul> <li>P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P280: Wear protective gloves/protective clothing/respiratory protection/eye protection/protective footwear.</li> <li>P302+P352: IF ON SKIN: Wash with plenty of water.</li> <li>P304+P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.</li> <li>P403+P233: Store in a well-ventilated place. Keep container tightly closed.</li> <li>P403+P235: Store in a well-ventilated place. Keep cool.</li> </ul>
	P501: Dispose of contents/container in accordance with regulations on hazardous waste or packaging and packaging waste respectively.
	Supplementary information:
	EUH204: Contains isocyanates. May produce an allergic reaction.
	Substances that contribute to the classification
	Hexamethylene diisocyanate, oligomers; 2-butoxyethyl acetate; m-xylene; p-xylene Additional Labelling:

# HARDENER CLEAR COAT CRYSTAL SLOW

# Printing: 21/12/2022 Date of compilation: 21/06/2022 Version: 1

# SECTION 2: HAZARDS IDENTIFICATION (continued)

As from 24 August 2023 adequate training is required before industrial or professional use.

#### 2.3 Other hazards:

Product fails to meet PBT/vPvB criteria

Endocrine-disrupting properties: The product fails to meet the criteria.

#### SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

#### 3.1 Substance:

Non-applicable

#### 3.2 Mixture:

Chemical description: Mixture composed of chemical products

#### Components:

In accordance with Annex II of Regulation (EC) No 1907/2006 (point 3), the product contains:

	Identification		Chemical name/Classification		Concentration
CAS:	28182-81-2	Hexamethylene diiso	cyanate, oligomers <sup>(1)</sup> Self-C	classified

(1) Substances presenting a health or environmental hazard which meet criteria laid down in Regulation (EU) No. 2020/878

(2) Substance with a Union workplace exposure limit

To obtain more information on the hazards of the substances consult sections 11, 12 and 16.

#### SECTION 4: FIRST AID MEASURES

#### 4.1 Description of first aid measures:

The symptoms resulting from intoxication can appear after exposure, therefore, in case of doubt, seek medical attention for direct exposure to the chemical product or persistent discomfort, showing the SDS of this product. **By inhalation:** 

inting:	21/12/2022 Date of compilation: 21/06/2022 Version: 1
SECT	ION 4: FIRST AID MEASURES (continued)
	Remove the person affected from the area of exposure, provide with fresh air and keep at rest. In serious cases such as cardiorespiratory failure, artificial resuscitation techniques will be necessary (mouth to mouth resuscitation, cardiac massage, oxygen supply, etc.) requiring immediate medical assistance. By skin contact:
	Remove contaminated clothing and footwear, rinse skin or shower the person affected if appropriate with plenty of cold water and neutral soap. In serious cases see a doctor. If the product causes burns or freezing, clothing should not be removed as this could worsen the injury caused if it is stuck to the skin. If blisters form on the skin, these should never be burst as this will increase the risk of infection. <b>By eye contact:</b>
	Rinse eyes thoroughly with water for at least 15 minutes. If the injured person uses contact lenses, these should be removed unless they are stuck to the eyes, in which case removal could cause further damage. In all cases, after cleaning, a doctor should be consulted as quickly as possible with the SDS for the product. By ingestion/aspiration:
4.2	Do not induce vomiting, but if it does happen keep the head down to avoid aspiration. Keep the person affected at rest. Rinse out the mouth and throat, as they may have been affected during ingestion. Most important symptoms and effects, both acute and delayed:
	Acute and delayed effects are indicated in sections 2 and 11.
4.3	Indication of any immediate medical attention and special treatment needed:
	Non-applicable

#### 5.1 Extinguishing media:

#### Suitable extinguishing media:

If possible use polyvalent powder fire extinguishers (ABC powder), alternatively use foam or carbon dioxide extinguishers (CO2).

#### Unsuitable extinguishing media:

IT IS RECOMMENDED NOT to use full jet water as an extinguishing agent.

#### 5.2 Special hazards arising from the substance or mixture:

As a result of combustion or thermal decomposition reactive sub-products are created that can become highly toxic and, consequently, can present a serious health risk.

#### 5.3 Advice for firefighters:

Depending on the magnitude of the fire it may be necessary to use full protective clothing and self-contained breathing apparatus (SCBA). Minimum emergency facilities and equipment should be available (fire blankets, portable first aid kit,...) in accordance with Directive 89/654/EC.

#### Additional provisions:

Act in accordance with the Internal Emergency Plan and the Information Sheets on actions to take after an accident or other emergencies. Eliminate all sources of ignition. In case of fire, cool the storage containers and tanks for products susceptible to combustion, explosion or BLEVE as a result of high temperatures. Avoid spillage of the products used to extinguish the fire into an aqueous medium.

#### SECTION 6: ACCIDENTAL RELEASE MEASURES

#### 6.1 Personal precautions, protective equipment and emergency procedures:

#### For non-emergency personnel:

Isolate leaks provided that there is no additional risk for the people performing this task. Evacuate the area and keep out those without protection. Personal protection equipment must be used against potential contact with the spilt product (See section 8). Above all prevent the formation of any vapour-air flammable mixtures, through either ventilation or the use of an inert medium. Remove any source of ignition. Eliminate electrostatic charges by interconnecting all the conductive surfaces on which static electricity could form, and also ensuring that all surfaces are connected to the ground.

#### For emergency responders:

Wear protective equipment. Keep unprotected persons away. See section 8.

#### 6.2 Environmental precautions:

# Printing: 21/12/2022 Date of compilation: 21/06/2022 Version: 1

# SECTION 6: ACCIDENTAL RELEASE MEASURES (continued)

Avoid at all cost any type of spillage into an aqueous medium. Contain the product absorbed appropriately in hermetically sealed containers. Notify the relevant authority in case of exposure to the general public or the environment.

## 6.3 Methods and material for containment and cleaning up:

It is recommended:

Absorb the spillage using sand or inert absorbent and move it to a safe place. Do not absorb in sawdust or other combustible absorbents. For any concern related to disposal consult section 13.

#### 6.4 Reference to other sections:

See sections 8 and 13.

#### SECTION 7: HANDLING AND STORAGE

#### 7.1 Precautions for safe handling:

#### A.- General precautions for safe use

Comply with the current legislation concerning the prevention of industrial risks. Keep containers hermetically sealed. Control spills and residues, destroying them with safe methods (section 6). Avoid leakages from the container. Maintain order and cleanliness where dangerous products are used.

B.- Technical recommendations for the prevention of fires and explosions

Transfer in well ventilated areas, preferably through localized extraction. Fully control sources of ignition (mobile phones, sparks,...) and ventilate during cleaning operations. Avoid the existence of dangerous atmospheres inside containers, applying inertization systems where possible. Transfer at a slow speed to avoid the creation of electrostatic charges. Against the possibility of electrostatic charges: ensure a perfect equipotential connection, always use groundings, do not wear work clothes made of acrylic fibres, preferably wearing cotton clothing and conductive footwear. Comply with the essential security requirements for equipment and systems defined in Directive 2014/34/EC (ATEX 100) and with the minimum requirements for protecting the security and health of workers under the selection criteria of Directive 1999/92/EC (ATEX 137). Consult section 10 for conditions and materials that should be avoided.

C.- Technical recommendations on general occupational hygiene

Do not eat or drink during the process, washing hands afterwards with suitable cleaning products.

D.- Technical recommendations to prevent environmental risks

Due to the danger of this product for the environment it is recommended to use it within an area containing contamination control barriers in case of spillage, as well as having absorbent material in close proximity.

#### 7.2 Conditions for safe storage, including any incompatibilities:

A.- Technical measures for storage

Minimum Temp.:	15 °C
Maximum Temp.:	25 °C
Maximum time:	12 Months

B.- General conditions for storage

Avoid sources of heat, radiation, static electricity and contact with food. For additional information see subsection 10.5

#### 7.3 Specific end use(s):

Except for the instructions already specified it is not necessary to provide any special recommendation regarding the uses of this product.

# SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

#### 8.1 Control parameters:

Substances whose occupational exposure limits have to be monitored in the workplace (European OEL, not country-specific legislation):

Directive (EU) 2000/39, Directive 2004/37/EC, Directive (EU) 2006/15, Directive (EU) 2009/161, Directive (EU) 2017/164, Directive (EU) 2019/1831:

Identification	Occupational exposure limits			
2-butoxyethyl acetate	IOELV (8h)	20 ppm	133 mg/m <sup>3</sup>	
CAS: 112-07-2 EC: 203-933-3	IOELV (STEL)	50 ppm	333 mg/m <sup>3</sup>

#### 8.2 **Exposure controls:**

A.- Individual protection measures, such as personal protective equipment

As a preventative measure it is recommended to use basic Personal Protective Equipment, with the corresponding <<CE marking>> in accordance with Regulation (EU) 2016/425. For more information on Personal Protective Equipment (storage, use, cleaning, maintenance, class of protection,...) consult the information leaflet provided by the manufacturer. For more information see subsection 7.1. All information contained herein is a recommendation which needs some specification from the labour risk prevention services as it is not known whether the company has additional measures at its disposal.

B.- Respiratory protection

# SECTION 10: STABILITY AND REACTIVITY

#### 10.1 Reactivity:

No hazardous reactions are expected because the product is stable under recommended storage conditions. See section 7.

rinting:	21/12/2022 Date	of compilation: 21/06/2022	Version: 1					
SECT	TON 10: STABILITY A	ND REACTIVITY (contin	ued)					
10.2	.2 Chemical stability:							
	Chemically stable under the indicated conditions of storage, handling and use.							
10.3	Possibility of hazardo	us reactions:						
	Under the specified conditions, hazardous reactions that lead to excessive temperatures or pressure are not expected.							
	Under the specified cond	litions, hazardous reactions	that lead to excessive tem	peratures or pressure are	e not expected.			
10.4	•	litions, hazardous reactions	that lead to excessive tem	peratures or pressure are	e not expected.			
10.4	Conditions to avoid:	litions, hazardous reactions Ind storage at room tempera		peratures or pressure are	e not expected.			
10.4	Conditions to avoid:			peratures or pressure are Sunlight	e not expected. Humidity			
10.4	Conditions to avoid: Applicable for handling a	nd storage at room tempera	ature:					
10.4 10.5	Conditions to avoid: Applicable for handling a Shock and friction	nd storage at room tempera Contact with air Not applicable	ature: Increase in temperature	Sunlight	Humidity			
	Conditions to avoid: Applicable for handling a Shock and friction Not applicable	nd storage at room tempera Contact with air Not applicable	ature: Increase in temperature	Sunlight	Humidity			

See subsection 10.3, 10.4 and 10.5 to find out the specific decomposition products. Depending on the decomposition conditions, complex mixtures of chemical substances can be released: carbon dioxide (CO<sub>2</sub>), carbon monoxide and other organic compounds.

#### SECTION 11: TOXICOLOGICAL INFORMATION

#### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008:

The experimental information related to the toxicological properties of the product itself is not available

#### Dangerous health implications:

In case of exposure that is repetitive, prolonged or at concentrations higher than the recommended occupational exposure limits, adverse effects on health may result, depending on the means of exposure:

A- Ingestion (acute effect):

- Acute toxicity : Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for consumption. For more information see section 3
- Corrosivity/Irritability: The consumption of a considerable dose can cause irritation in the throat, abdominal pain, nausea and vomiting.
- B- Inhalation (acute effect):
  - Acute toxicity : Exposure in high concentration can interfere with the central nervous system causing headache, dizziness, vertigo, nausea, vomiting, confusion, and in serious cases, loss of consciousness.
  - Corrosivity/Irritability: Causes irritation in respiratory passages, which is normally reversible and limited to the upper respiratory passages.
- C- Contact with the skin and the eyes (acute effect):
  - Contact with the skin: Produces skin inflammation.
  - Contact with the eyes: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect. For more information see section 3.
- D- CMR effects (carcinogenicity, mutagenicity and toxicity to reproduction):
  - Carcinogenicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for the effects mentioned. For more information see section 3.
  - IARC: Ethylbenzene (2B); m-xylene (3); p-xylene (3); Hydrocarbons, C9, aromatics (3)
  - Mutagenicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect. For more information see section 3.
  - Reproductive toxicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect. For more information see section 3.
- E- Sensitizing effects:
  - Respiratory: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous with sensitising effects. For more information see section 3.
  - Skin: Prolonged contact with the skin can result in episodes of allergic contact dermatitis.
- F- Specific target organ toxicity (STOT) single exposure:

Causes irritation in respiratory passages, which is normally reversible and limited to the upper respiratory passages.

Printing: 21/12/2022	Date of compilation: 21/06/2022	Version: 1
SECTION 11: TOXIC	OLOGICAL INFORMATION (co	ntinued)

# G- Specific target organ toxicity (STOT)-repeated exposure:

- Specific target organ toxicity (STOT)-repeated exposure: Based on available data, the classification criteria are not met. However, it does contain substances which are classified as dangerous due to repetitive exposure. For more information see section 3.

- Skin: Based on available data, the classification criteria are not met. However, it does contain substances which are classified as dangerous due to repetitive exposure. For more information see section 3.

H- Aspiration hazard:

Based on available data, the classification criteria are not met. However, it does contain substances classified as hazardous for this effect. For more information see section 3.

# Other information:

# Non-applicable

#### Specific toxicology information on the substances:

Identification	A	cute toxicity	Genus
N-butyl acetate	LD50 oral	12789 mg/kg	Rat
CAS: 123-86-4	LD50 dermal	14112 mg/kg	Rabbit
EC: 204-658-1	LC50 inhalation	23,4 mg/L (4 h)	Rat
Hexamethylene diisocyanate, oligomers	LD50 oral	5100 mg/kg	Rat

# SECTION 13: DISPOSAL CONSIDERATIONS

# Printing: 21/12/2022 Date of compilation: 21/06/2022 Version: 1

# SECTION 13: DISPOSAL CONSIDERATIONS (continued)

#### **13.1 Waste treatment methods:**

Code	Description	Waste class (Regulation (EU) No 1357/2014)
08 01 11* 15 01 10* 15 01 11*	waste paint and varnish containing organic solvents or other hazardous substances packaging containing residues of or contaminated by hazardous substances metallic packaging containing a hazardous solid porous matrix (for example asbestos), including empty pressure containers	Dangerous

#### Type of waste (Regulation (EU) No 1357/2014):

HP14 Ecotoxic, HP3 Flammable, HP5 Specific Target Organ Toxicity (STOT)/Aspiration Toxicity, HP6 Acute Toxicity, HP13 Sensitising, HP4 Irritant — skin irritation and eye damage

#### Waste management (disposal and evaluation):

Consult the authorized waste service manager on the assessment and disposal operations in accordance with Annex 1 and Annex 2 (Directive 2008/98/EC). As under 15 01 (2014/955/EC) of the code and in case the container has been in direct contact with the product, it will be processed the same way as the actual product. Otherwise, it will be processed as non-dangerous residue. Waste should not be disposed of to drains. See paragraph 6.2.

#### Regulations related to waste management:

In accordance with Annex II of Regulation (EC) No 1907/2006 (REACH) the community or state provisions related to waste management are stated

Community legislation: Directive 2008/98/EC, 2014/955/EU, Regulation (EU) No 1357/2014

CTION 15	REGULATORY INFORMATION (continued)
	t be used in:
—ornan	nental articles intended to produce light or colour effects by means of different phases, for example in ornamental lamps
and ash	
	and jokes,
	s for one or more participants, or any article intended to be used as such, even with ornamental aspects.
	s more than 0.1 % of Hexamethylene diisocyanate, oligomers by weight. 1. Shall not be used as substances on their owr
	stituent in other substances or in mixtures for industrial and professional use(s) after 24 August 2023, unless:
(a) the	concentration of diisocyanates individually and in combination is less than 0,1 % by weight, or (b) the employer or self-
	ed ensures that industrial or professional user(s) have successfully completed training on the safe use of diisocyanates
	the use of the substance(s) or mixture(s).
	not be placed on the market as substances on their own, as a constituent in other substances or in mixtures for industria
	fessional use(s) after 24 February 2022, unless:
	concentration of diisocyanates individually and in combination is less than $0,1$ % by weight, or (b) the supplier ensures
	recipient of the substance(s) or mixture(s) is provided with information on the requirements referred to in point (b) of
	oh 1 and the following statement is placed on the packaging, in a manner that is visibly distinct from the rest of the labe
	tion: "As from 24 August 2023 adequate training is required before industrial or professional use". The purpose of this entry "industrial and professional user(s)" means any worker or self-employed worker handling
	nates on their own, as a constituent in other substances or in mixtures for industrial and professional use(s) or
	ing these tasks.
	raining referred to in point (b) of paragraph 1 shall include the instructions for the control of dermal and inhalation
	e to diisocyanates at the workplace without prejudice to any national occupational exposure limit value or other
	iate risk management measures at national level. Such training shall be conducted by an expert on occupational safety
	Ith with competence acquired by relevant vocational training. That training shall cover as a minimum:
	raining elements in point (a) of paragraph 5 for all industrial and professional use(s).
	raining elements in points (a) and (b) of paragraph 5 for the following uses:
	ing open mixtures at ambient temperature (including foam tunnels)
— spray	ing in a ventilated booth
— appli	cation by roller
— applie	cation by brush
	cation by dipping and pouring
	anical post treatment (e.g. cutting) of not fully cured articles which are not warm anymore
	ing and waste
	ther uses with similar exposure through the dermal and/or inhalation route
	raining elements in points (a), (b) and (c) of paragraph 5 for the following uses: ing incompletely cured articles (e.g. freshly cured, still warm)
	Iry applications
	enance and repair that needs access to equipment
	handling of warm or hot formulations (> 45 °C)
	ing in open air, with limited or only natural ventilation (includes large industry working halls) and spraying with high
	(e.g. foams, elastomers)
— and a	iny other uses with similar exposure through the dermal and/or
inhalatio	
5. Traini	ng elements:
(a) gene	eral training, including on-line training, on:
— chem	istry of diisocyanates
— toxici	ty hazards (including acute toxicity)
	sure to diisocyanates
	bational exposure limit values
	sensitisation can develop
	r as indication of hazard
	tance of volatility for risk
	sity, temperature, and molecular weight of diisocyanates
•	nal hygiene
	nal protective equipment needed, including practical instructions for its correct use and its limitations
	f dermal contact and inhalation exposure
	n relation to application process used
	and inhalation protection scheme
— venti — clean
