## MATT 1:2

SEC.	TION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING
1.1	Product identifier: MATT 1:2
	Other means of identification:
	UFI: 2071-C16T-T00K-WXQ9
1.2	Relevant identified uses of the substance or mixture and uses advised against:
	Relevant uses: Car repair; hardener for coatings. For professional users only.
	Uses advised against: All uses not specified in this section or in section 7.3
1.3	Details of the supplier of the safety data sheet:
1.0	Troton Sp. z o.o.
	Ząbrowo 14A
	78-120 Gościno - Zachodniopomorskie - Polska Phone: +48 94 35 123 94 - Fax: +48 94 35 126 22
	troton@troton.com.pl
	www.troton.pl / www.troton.eu
1.4	Emergency telephone number: (8am-4pm)+48 094 35 123 94; 112
SEC	TION 2: HAZARDS IDENTIFICATION
2.1	Classification of the substance or mixture:
	CLP Regulation (EC) No 1272/2008:
	Classification of this product has been carried out in accordance with CLP Regulation (EC) No 1272/2008.
	Acute Tox. 4: Acute inhalation toxicity, Category 4, H332 Aquatic Chronic 3: Hazardous to the aquatic environment, long-term hazard, Category 3, H412 Flam. Liq. 3: Flammable liquids, Category 3, H226 Skin Irrit. 2: Skin irritation, Category 2, H315 Skin Sens. 1: Sensitisation, skin, Category 1, H317 STOT SE 3: Respiratory tract toxicity, single exposure, Category 3, H335 STOT SE 3: Specific toxicity causing drowsiness and dizziness, single exposure, Category 3, H336
2.2	Label elements:
	CLP Regulation (EC) No 1272/2008:
	Warning
	Hazard statements:
	Acute Tox. 4: H332 - Harmful if inhaled. Aquatic Chronic 3: H412 - Harmful to aquatic life with long lasting effects. Flam. Liq. 3: H226 - Flammable liquid and vapour. Skin Irrit. 2: H315 - Causes skin irritation. Skin Sens. 1: H317 - May cause an allergic skin reaction. STOT SE 3: H335 - May cause respiratory irritation. STOT SE 3: H336 - May cause drowsiness or dizziness.
	Precautionary statements:
	<ul> <li>P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P280: Wear protective gloves/protective clothing/respiratory protection/eye protection/protective footwear.</li> <li>P302+P352: IF ON SKIN: Wash with plenty of water.</li> <li>P304+P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.</li> <li>P403+P233: Store in a well-ventilated place. Keep container tightly closed.</li> <li>P403+P235: Store in a well-ventilated place. Keep cool.</li> <li>P501: Dispose of contents/container in accordance with regulations on hazardous waste or packaging and packaging waste respectively.</li> </ul>
	Supplementary information:
	EUH204: Contains isocyanates. May produce an allergic reaction.
	Substances that contribute to the classification

This SDS is an English translation of COMMISSION REGULATION (EU) 2020/878, without any country-specific legislation

## MATT 1:2

Printing: 31/07/2023 Date of compilation: 31/07/2023 Version: 1

## SECTION 2: HAZARDS IDENTIFICATION (continued)

Hexamethylene diisocyanate, oligomers; Hydrocarbons, C9, aromatics; 2-butoxyethyl acetate; m-xylene

## **Additional Labelling:**

As from 24 August 2023 adequate training is required before industrial or professional use.

## 2.3 Other hazards:

Product does not meet PBT/vPvB criteria

Endocrine-disrupting properties: The product does not meet the criteria.

## SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

## 3.1 Substance:

Non-applicable

## 3.2 Mixture:

Chemical description: Mixture composed of chemical products

#### Components:

In accordance with Annex II of Regulation (EC) No 1907/2006 (point 3), the product contains:

	Identification		Chemical name/Classification		Concentration
CAS: EC:	28182-81-2 931-274-8	Hexamethylene diiso	ocyanate, oligomers <sup>(1)</sup>	Self-classified	
Index:	Non-applicable 01-2119485796-17- XXXX	Regulation 1272/2008	Acute Tox. 4: H332; Skin Sens. 1: H317; STOT SE 3: H335 - Warning	()	25 - <50 %

EC: 203-396-5	LC50 inhalation	11 mg/L (ATEi)	

## SECTION 4: FIRST AID MEASURES

#### 4.1 Description of first aid measures:

The symptoms resulting from intoxication can appear after exposure, therefore, in case of doubt, seek medical attention for direct exposure to the chemical product or persistent discomfort, showing the SDS of this product.

## By inhalation:

Remove the person affected from the area of exposure, provide with fresh air and keep at rest. In serious cases such as cardiorespiratory failure, artificial resuscitation techniques will be necessary (mouth to mouth resuscitation, cardiac massage, oxygen supply, etc.) requiring immediate medical assistance.

## By skin contact:

Remove contaminated clothing and footwear, rinse skin or shower the person affected if appropriate with plenty of cold water and neutral soap. In serious cases see a doctor. If the product causes burns or freezing, clothing should not be removed as this could worsen the injury caused if it is stuck to the skin. If blisters form on the skin, these should never be burst as this will increase the risk of infection.

## By eye contact:

Rinse eyes thoroughly with water for at least 15 minutes. If the injured person uses contact lenses, these should be removed unless they are stuck to the eyes, in which case removal could cause further damage. In all cases, after cleaning, a doctor should be consulted as quickly as possible with the SDS for the product.

#### By ingestion/aspiration:

Do not induce vomiting, but if it does happen keep the head down to avoid aspiration. Keep the person affected at rest. Rinse out the mouth and throat, as they may have been affected during ingestion.

## 4.2 Most important symptoms and effects, both acute and delayed:

Acute and delayed effects are indicated in sections 2 and 11.

## 4.3 Indication of any immediate medical attention and special treatment needed:

#### Non-applicable

## SECTION 5: FIREFIGHTING MEASURES

## 5.1 Extinguishing media:

#### Suitable extinguishing media:

If possible use polyvalent powder fire extinguishers (ABC powder), alternatively use foam or carbon dioxide extinguishers (CO2).

## Unsuitable extinguishing media:

IT IS RECOMMENDED NOT to use full jet water as an extinguishing agent.

## 5.2 Special hazards arising from the substance or mixture:

As a result of combustion or thermal decomposition reactive sub-products are created that can become highly toxic and, consequently, can present a serious health risk.

## 5.3 Advice for firefighters:

Depending on the magnitude of the fire it may be necessary to use full protective clothing and self-contained breathing apparatus (SCBA). Minimum emergency facilities and equipment should be available (fire blankets, portable first aid kit,...) in accordance with Directive 89/654/EC.

## Additional provisions:

## Printing: 31/07/2023 Date of compilation: 31/07/2023 Version: 1

## SECTION 5: FIREFIGHTING MEASURES (continued)

Act in accordance with the Internal Emergency Plan and the Information Sheets on actions to take after an accident or other emergencies. Eliminate all sources of ignition. In case of fire, cool the storage containers and tanks for products susceptible to combustion, explosion or BLEVE as a result of high temperatures. Avoid spillage of the products used to extinguish the fire into an aqueous medium.

## SECTION 6: ACCIDENTAL RELEASE MEASURES

#### 6.1 Personal precautions, protective equipment and emergency procedures:

#### For non-emergency personnel:

Isolate leaks provided that there is no additional risk for the people performing this task. Evacuate the area and keep out those without protection. Personal protection equipment must be used against potential contact with the spilt product (See section 8). Above all prevent the formation of any vapour-air flammable mixtures, through either ventilation or the use of an inert medium. Remove any source of ignition. Eliminate electrostatic charges by interconnecting all the conductive surfaces on which static electricity could form, and also ensuring that all surfaces are connected to the ground.

#### For emergency responders:

Wear protective equipment. Keep unprotected persons away. See section 8.

#### 6.2 Environmental precautions:

Avoid at all cost any type of spillage into an aqueous medium. Contain the product absorbed appropriately in hermetically sealed containers. Notify the relevant authority in case of exposure to the general public or the environment.

#### 6.3 Methods and material for containment and cleaning up:

It is recommended:

Absorb the spillage using sand or inert absorbent and move it to a safe place. Do not absorb in sawdust or other combustible absorbents. For any concern related to disposal consult section 13.

#### 6.4 Reference to other sections:

See sections 8 and 13.

## SECTION 7: HANDLING AND STORAGE

## 7.1 Precautions for safe handling:

A.- General precautions for safe use

Comply with the current legislation concerning the prevention of industrial risks. Keep containers hermetically sealed. Control spills and residues, destroying them with safe methods (section 6). Avoid leakages from the container. Maintain order and cleanliness where dangerous products are used.

B.- Technical recommendations for the prevention of fires and explosions

Transfer in well ventilated areas, preferably through localized extraction. Fully control sources of ignition (mobile phones, sparks,...) and ventilate during cleaning operations. Avoid the existence of dangerous atmospheres inside containers, applying inertization systems where possible. Transfer at a slow speed to avoid the creation of electrostatic charges. Against the possibility of electrostatic charges: ensure a perfect equipotential connection, always use groundings, do not wear work clothes made of acrylic fibres, preferably wearing cotton clothing and conductive footwear. Comply with the essential security requirements for equipment and systems defined in Directive 2014/34/EC (ATEX 100) and with the minimum requirements for protecting the security and health of workers under the selection criteria of Directive 1999/92/EC (ATEX 137). Consult section 10 for conditions and materials that should be avoided.

C.- Technical recommendations on general occupational hygiene

Do not eat or drink during the process, washing hands afterwards with suitable cleaning products.

D.- Technical recommendations to prevent environmental risks

Due to the danger of this product for the environment it is recommended to use it within an area containing contamination control barriers in case of spillage, as well as having absorbent material in close proximity.

## 7.2 Conditions for safe storage, including any incompatibilities:

#### A.- Technical measures for storage

Minimum Temp.:	15 °C
Maximum Temp.:	25 °C
Maximum time:	12 Months

Printing: 31/07/2023 Date of compilation: 31/07/2023 Version: 1

## SECTION 7: HANDLING AND STORAGE (continued)

B.- General conditions for storage

Avoid sources of heat, radiation, static electricity and contact with food. For additional information see subsection 10.5

## 7.3 Specific end use(s):

Except for the instructions already specified it is not necessary to provide any special recommendation regarding the uses of this product.

## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

## 8.1 Control parameters:

Substances whose occupational exposure limits have to be monitored in the workplace (European OEL, not country-specific legislation):

Directive (EU) 2000/39, Directive 2004/37/EC, Directive (EU) 2006/15, Directive (EU) 2009/161, Directive (EU) 2017/164, Directive (EU) 2019/1831:

## MATT 1:2

#### Printing: 31/07/2023 Date of compilation: 31/07/2023 Version: 1 SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES (continued) Refraction index: Non-applicable \* \*Not relevant due to the nature of the product, not providing information property of its hazards. SECTION 10: STABILITY AND REACTIVITY 10.1 Reactivity: No hazardous reactions are expected because the product is stable under recommended storage conditions. See section 7. 10.2 Chemical stability: Chemically stable under the indicated conditions of storage, handling and use. 10.3 Possibility of hazardous reactions: Under the specified conditions, hazardous reactions that lead to excessive temperatures or pressure are not expected. 10.4 Conditions to avoid: Applicable for handling and storage at room temperature: Humidity Shock and friction Contact with air Increase in temperature Sunlight Not applicable Not applicable Risk of combustion Avoid direct impact Not applicable 10.5 Incompatible materials: Acids Water Oxidising materials Combustible materials Others Avoid strong acids Not applicable Avoid direct impact Not applicable Avoid alkalis or strong bases 10.6 Hazardous decomposition products: See subsection 10.3, 10.4 and 10.5 to find out the specific decomposition products. Depending on the decomposition conditions, complex mixtures of chemical substances can be released: carbon dioxide (CO<sub>2</sub>), carbon monoxide and other organic compounds.

## SECTION 11: TOXICOLOGICAL INFORMATION

## 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008:

The experimental information related to the toxicological properties of the product itself is not available

#### Dangerous health implications:

In case of exposure that is repetitive, prolonged or at concentrations higher than the recommended occupational exposure limits, adverse effects on health may result, depending on the means of exposure: A- Ingestion (acute effect):

- Acute toxicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as

hazardous for consumption. For more information see section 3

- Corrosivity/Irritability: The consumption of a considerable dose can cause irritation in the throat, abdominal pain, nausea and vomiting.

B- Inhalation (acute effect):

- Acute toxicity : Exposure in high concentration can interfere with the central nervous system causing headache, dizziness, vertigo, nausea, vomiting, confusion, and in serious cases, loss of consciousness.

- Corrosivity/Irritability: Causes irritation in respiratory passages, which is normally reversible and limited to the upper respiratory passages.

- C- Contact with the skin and the eyes (acute effect):
  - Contact with the skin: Produces skin inflammation.
  - Contact with the eyes: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect. For more information see section 3.
- D- CMR effects (carcinogenicity, mutagenicity and toxicity to reproduction):

- Carcinogenicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for the effects mentioned. For more information see section 3.

IARC: Ethylbenzene (2B); m-xylene (3); p-xylene (3); Hydrocarbons, C9, aromatics (3)

- Mutagenicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect. For more information see section 3.

- Reproductive toxicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect. For more information see section 3.

ON 11: TOXICOLOGICAL INFORMATION (continu	led)		
E- Sensitizing effects:	,		
	ion critorio aro not mot oc it doo	a not contain aubatance	a alaasifia
<ul> <li>Respiratory: Based on available data, the classification</li> <li>hazardous with sensitising effects. For more information</li> <li>Skin: Prolonged contact with the skin can result in end</li> </ul>	on see section 3.		
F- Specific target organ toxicity (STOT) - single exposure	:		
Causes irritation in respiratory passages, which is norn	nally reversible and limited to the	e upper respiratory pass	ages.
G- Specific target organ toxicity (STOT)-repeated exposur	re:		
<ul> <li>Specific target organ toxicity (STOT)-repeated expo However, it does contain substances which are classifie section 3.</li> <li>Skin: Based on available data, the classification crite classified as dangerous due to repetitive exposure. For H- Aspiration hazard:</li> </ul>	ed as dangerous due to repetitive eria are not met. However, it doe	e exposure. For more int	formation

Printing: 31/07/2023 Date of compilation: 31/07/2023 Version: 1

## SECTION 11: TOXICOLOGICAL INFORMATION (continued)

Endocrine-disrupting properties: The product does not meet the criteria.

Other information

Non-applicable

## SECTION 12: ECOLOGICAL INFORMATION

The experimental information related to the eco-toxicological properties of the product itself is not available

## 12.1 Toxicity:

#### Acute toxicity:

Identification		Concentration	Species	Genus
Hexamethylene diisocyanate, oligomers	LC50	Non-applicable		
CAS: 28182-81-2	EC50	Non-applicable		
EC: 931-274-8	EC50	1000 mg/L (72 h)	Scenedesmus subspicatus	Algae
Hydrocarbons, C9, aromatics	LC50	>1 - 10 mg/L (96 h)		Fish
CAS: 128601-23-0	EC50	>1 - 10 mg/L (48 h)		Crustacean
EC: 918-668-5	EC50	>1 - 10 mg/L (72 h)		Algae
2-butoxyethyl acetate	LC50	80 mg/L (48 h)	Leuciscus idus	Fish
CAS: 112-07-2	EC50	37 mg/L (48 h)	Daphnia magna	Crustacean
EC: 203-933-3	EC50	500 mg/L (72 h)	Scenedesmus subspicatus	Algae
m-xylene	LC50	16 mg/L (96 h)	Carassius auratus	Fish
CAS: 108-38-3	EC50	9,56 mg/L (48 h)	Daphnia magna	Crustacean
EC: 203-576-3	EC50	Non-applicable		
p-xylene	LC50	2,6 mg/L (96 h)	Oncorhynchus mykiss	Fish
CAS: 106-42-3	EC50	8,5 mg/L (48 h)	Daphnia magna	Crustacean
EC: 203-396-5	EC50	Non-applicable		
N-butyl acetate	LC50	Non-applicable		
CAS: 123-86-4	EC50	Non-applicable		
EC: 204-658-1	EC50	675 mg/L (72 h)	Scenedesmus subspicatus	Algae
Ethylbenzene	LC50	42,3 mg/L (96 h)	Pimephales promelas	Fish
CAS: 100-41-4	EC50	75 mg/L (48 h)	Daphnia magna	Crustacean
EC: 202-849-4	EC50	63 mg/L (3 h)	Chlorella vulgaris	Algae
2-methoxy-1-methylethyl acetate	LC50	161 mg/L (96 h)	Pimephales promelas	Fish
CAS: 108-65-6	EC50	481 mg/L (48 h)	Daphnia sp.	Crustacean
EC: 203-603-9	EC50	Non-applicable		

## Chronic toxicity:

Identification		Concentration	Species	Genus
m-xylene	NOEC	0,714 mg/L	Danio rerio	Fish
CAS: 108-38-3 EC: 203-576-3	NOEC	1,57 mg/L	Daphnia magna	Crustacean

Printing: 31/07/2023 Date of compilation: 31/07/2023 Version: 1

## SECTION 12: ECOLOGICAL INFORMATION (continued)

Product does not meet PBT/vPvB criteria

#### 12.6 Endocrine disrupting properties:

Endocrine-disrupting properties: The product does not meet the criteria.

#### **12.7** Other adverse effects:

Not described

## SECTION 13: DISPOSAL CONSIDERATIONS

## **13.1 Waste treatment methods:**

Code	Description	Waste class (Regulation (EU) No 1357/2014)
	waste paint and varnish containing organic solvents or other hazardous substances packaging containing residues of or contaminated by hazardous substances	Dangerous

## Type of waste (Regulation (EU) No 1357/2014):

HP14 Ecotoxic, HP3 Flammable, HP5 Specific Target Organ Toxicity (STOT)/Aspiration Toxicity, HP6 Acute Toxicity, HP13 Sensitising

## Waste management (disposal and evaluation):

Consult the authorized waste service manager on the assessment and disposal operations in accordance with Annex 1 and Annex 2 (Directive 2008/98/EC). As under 15 01 (2014/955/EC) of the code and in case the container has been in direct contact with the product, it will be processed the same way as the actual product. Otherwise, it will be processed as non-dangerous residue. Waste should not be disposed of to drains. See paragraph 6.2.

#### **Regulations related to waste management:**

In accordance with Annex II of Regulation (EC) No 1907/2006 (REACH) the community or state provisions related to waste management are stated

Community legislation: Directive 2008/98/EC, 2014/955/EU, Regulation (EU) No 1357/2014

## SECTION 14: TRANSPORT INFORMATION

## **MATT 1:2**

	ION 15: REGULATORY INFORMATION (continued)
SECT.	ION IS: REGULATORY INFORMATION (COntinued)
	Shall not be used in:
	-ornamental articles intended to produce light or colour effects by means of different phases, for example in ornamental lamps
	and ashtrays, —tricks and jokes,
	games for one or more participants, or any article intended to be used as such, even with ornamental aspects.
	Contains more than 0.1 % of Hexamethylene diisocyanate, oligomers by weight. 1. Shall not be used as substances on their own,
	as a constituent in other substances or in mixtures for industrial and professional use(s) after 24 August 2023, unless:
	(a) the concentration of diisocyanates individually and in combination is less than 0,1 % by weight, or (b) the employer or self-
	employed ensures that industrial or professional user(s) have successfully completed training on the safe use of diisocyanates
	prior to the use of the substance(s) or mixture(s).
	2. Shall not be placed on the market as substances on their own, as a constituent in other substances or in mixtures for industrial
	and professional use(s) after 24 February 2022, unless:
	(a) the concentration of disocyanates individually and in combination is less than 0,1 % by weight, or (b) the supplier ensures
	that the recipient of the substance(s) or mixture(s) is provided with information on the requirements referred to in point (b) of paragraph 1 and the following statement is placed on the packaging, in a manner that is visibly distinct from the rest of the label
	information: "As from 24 August 2023 adequate training is required before industrial or professional use".
	3. For the purpose of this entry "industrial and professional user(s)" means any worker or self-employed worker handling
	diisocyanates on their own, as a constituent in other substances or in mixtures for industrial and professional use(s) or
	supervising these tasks.
	4. The training referred to in point (b) of paragraph 1 shall include the instructions for the control of dermal and inhalation
	exposure to diisocyanates at the workplace without prejudice to any national occupational exposure limit value or other
	appropriate risk management measures at national level. Such training shall be conducted by an expert on occupational safety
	and health with competence acquired by relevant vocational training. That training shall cover as a minimum:
	<ul><li>(a) the training elements in point (a) of paragraph 5 for all industrial and professional use(s).</li><li>(b) the training elements in points (a) and (b) of paragraph 5 for the following uses:</li></ul>
	— handling open mixtures at ambient temperature (including foam tunnels)
	- spraying in a ventilated booth
	- application by roller
	— application by brush
	<ul> <li>application by dipping and pouring</li> </ul>
	<ul> <li>mechanical post treatment (e.g. cutting) of not fully cured articles which are not warm anymore</li> </ul>
	— cleaning and waste
	— any other uses with similar exposure through the dermal and/or inhalation route $(a)$ the training elements in points $(a)$ $(b)$ and $(c)$ of paragraph 5 for the following uses:
	(c) the training elements in points (a), (b) and (c) of paragraph 5 for the following uses: — handling incompletely cured articles (e.g. freshly cured, still warm)
	— foundry applications
	— maintenance and repair that needs access to equipment
	— open handling of warm or hot formulations (> $45 \circ$ C)
	- spraying in open air, with limited or only natural ventilation (includes large industry working halls) and spraying with high
	energy (e.g. foams, elastomers)
	— and any other uses with similar exposure through the dermal and/or
	inhalation route.
	5. Training elements:
	(a) general training, including on-line training, on: — chemistry of diisocyanates
	- toxicity hazards (including acute toxicity)
	- exposure to diisocyanates
	<ul> <li>occupational exposure limit values</li> </ul>
	<ul> <li>how sensitisation can develop</li> </ul>
	<ul> <li>odour as indication of hazard</li> </ul>
	- importance of volatility for risk
	<ul> <li>viscosity, temperature, and molecular weight of diisocyanates</li> </ul>
	<ul> <li>personal hygiene</li> <li>personal protective equipment needed, including practical instructions for its correct use and its limitations</li> </ul>

SECTI	ON 15: REGULATORY INFORMATION (continued)
	<ul> <li>certification or documented proof that training has been successfully completed</li> <li>(b) intermediate level training, including on-line training, on:</li> <li>additional behaviour-based aspects</li> <li>maintenance</li> <li>management of change</li> <li>evaluation of existing safety instructions</li> <li>risk in relation to application process used</li> <li>certification or documented proof that training has been successfully completed</li> <li>(c) advanced training, including on-line training, on:</li> <li>any additional certification needed for the specific uses covered</li> <li>spraying outside a spraying booth</li> <li>open handling of hot or warm formulations (&gt; 45 °C)</li> <li>certification or documented proof that training has been successfully completed</li> <li>6. The training shall comply with the provisions set by the Member State in which the industrial or professional user(s) operate.</li> <li>Member States may implement or continue to apply their own national requirements for the use of the substance(s) or mixture (s), as long as the minimum requirements set out in paragraphs 4 and 5 are met.</li> <li>7. The supplier referred to in point (b) of paragraph 2 shall ensure that the recipient is provided with training material and courses pursuant to paragraphs 4 and 5 in the official language(s) of the Member State(s) where the substance(s) or mixture(s) are supplied. The training shall take into consideration the specificity of the products supplied, including composition, packaging, and design.</li> <li>8. The employer or self-employed shall document the successful completion of the training referred to in paragraphs 4 and 5. The training shall be renewed at least every five years.</li> <li>9. Member States shall include in their reports pursuant to Article 117(1) the following information:</li> <li>(a) any established training requirements and other risk management measures related to the industrial and professional uses of diisocyanates (oresease in national law</li> <li>(b) the numbe</li></ul>
	(d) information about enforcement activities related to this restriction. 10. This restriction shall apply without prejudice to other Union legislation on the protection of safety and health of workers at the workplace.
	Specific provisions in terms of protecting people or the environment:
	It is recommended to use the information included in this safety data sheet as a basis for conducting workplace-specific risk assessments in order to establish the necessary risk prevention measures for the handling, use, storage and disposal of this product.
	Other legislation:
	The product could be affected by sectorial legislation
15.2	Chemical safety assessment:
	The supplier has not carried out evaluation of chemical safety.
SECTI	ON 16: OTHER INFORMATION
-	Legislation related to safety data sheets: The SDS shall be supplied in an official language of the country where the product is placed on the market. This safety data sheet has been designed in accordance with ANNEX II-Guide to the compilation of safety data sheets of Regulation (EC) No 1907/2006 (COMMISSION REGULATION (EU) 2020/878). Modifications related to the previous Safety Data Sheet which concerns the ways of managing risks.:

## Modifications related to the previous Safety Data Sheet which concerns the ways of managing risks.:

Non-applicable

#### Texts of the legislative phrases mentioned in section 2:

H317: May cause an allergic skin reaction.

H335: May cause respiratory irritation.

H336: May cause drowsiness or dizziness.

H315: Causes skin irritation.

H412: Harmful to aquatic life with long lasting effects.

H332: Harmful if inhaled.

H226: Flammable liquid and vapour.

## Texts of the legislative phrases mentioned in section 3:

The phrases indicated do not refer to the product itself; they are present merely for informative purposes and refer to the individual components which appear in section 3

Safety data sheet LI L This SDS is an English translation of COMMISSION REGULATION (EU) 2020/878, without any country-specific legislation
