

AIRFLEX

MULTIFUNCTIONAL POLYESTER PUTTY
LIGHTWEIGHT AND FLEXIBLE

NEW

High quality multifunctional 2k polyester putty designed for quick automotive repairs. It combines the features of a filling and finishing putty.

It is perfect for filling defects and bumps in metal and plastic parts exposed to deformation and vibration.

It is characterized by high elasticity, lightness and glaze type consistency.

- **High flexibility.**
- **Excellent adhesion to all types of surfaces, including plastics.**
- Very smooth surface after application and sanding.
- Perfect for use on large surfaces (low specific weight).
- Self-levelling surface after application.
- Extremely easy to sand.

Color: beige

Curing time: 25÷35 minutes at 20°C
