

TROTON[®]

Automotive Industry Boatbuilding

Refinish products manufacturer since 1978

CEO's Foreword

Dear Sir and Madam,

When back in the 70s I founded this company and created the first products in a garage of my house, I could never have imagined that it would grow to such extent. At that time it was unrealistic to think that at certain point we would own more than 10 000 sq m of production site and at the same time consider building a new factory. When we started, the market was like a sponge - you could sell anything that you produced, all it took was to have an idea and the desire to make it happen. Back in the days the biggest challenge we had, was the availability of raw materials. My memories from those times could easily serve as an absurd comedy scenario. Governmental suppliers were not keen to cooperate with private investors. I remember that it was impossible to get empty tubes, so instead we bought a lot of toothpaste, squeezed out what was inside and replaced them with our hardener. When we were out of cans, I was buying cheap coffee in beautiful shiny cans and then we were just giving coffee to all our family members. After that, those cans were filled with putty. During more than 44 years, every team member contributed to the development of the Troton company. It is not me, who created this company. I just gathered people around me, who built everything we have today.

I believe that the solutions our expert team has to offer, will make you interested enough to consider starting a new long lasting cooperation with us. We are awaiting your questions, comments and remarks. There is no product we are not able to make, with your contribution or suggestion. We offer you our knowledge and with our partnership we can achieve the best results. I invite you to familiarize yourself with our offer and to contact us, to create something even bigger together.

Jan Wolejszo
CEO of Troton Ltd.

Troton's values

High quality

To provide good products that ensure effectiveness and high quality consistency

Security

A strong partnership cooperation with our distributors and the highest quality of our products provides security to our users

Accessibility

To provide professional and individual support as well as accessible information about each product

Being an expert

To provide technical and training support

Who are we?

TROTON is a Manufacturer of Car Refinishing Products like Body Fillers, Putties, Primers, Clearcoats and Polishing Systems. We produce a variety of products for automotive, yachting and industrial segments. We have been in the refinish industry for over 44 years with clients all over the world, exporting to more than 70 countries in Europe, Asia, Africa, North and South America, Australia and New Zealand.

We strive to offer our partners the best customer service. In order to meet the demands of so many different markets, we have one of the widest offers in our industry. In the heart of our success lies our team of over 200 people, involved in research and development, production and sales of high quality products.

Our factory provides well organized infrastructure, well equipped production unit with modern technology and our own R&D team that builds innovative products according to customer needs.

Company's history

From manual production in a garage to export to over 70 countries in the world

CSR

In Troton, we support many social and ecological campaigns.

Being responsible as a corporation does not only mean meeting formal and legal requirements, but it is also an investment in human resources, environmental protection and relationship with our partners. For Troton Corporate Social Responsibility especially means an investment in people and ecology. The idea to propagate ecological awareness is always more important than costs and revenue for us. Thanks to such types of solutions in improving actions and tasks to reduce negative impact on the environment, we were awarded ISO 14001 and „Together for sustainability” certificates. We are proud to be able to show off our ecological achievements.

Our environmental protection actions:

- Ecological education and awareness
- Organizing and taking part in ecological programs
- Advanced recycling
- Eco apiculture
- Active support of wolves' protection
- Avoiding dangerous chemical compounds & leakage
- Supporting ecological organizations
- Investing in renewable energy
- Retrieving rainwater

Find out about our benefits, become our distributor

As a refinish manufacturer with over 40-years of experience, we offer a wide range of benefits to our business partners. Join us and become Troton's distributor.

Wide range of high quality
refinish products

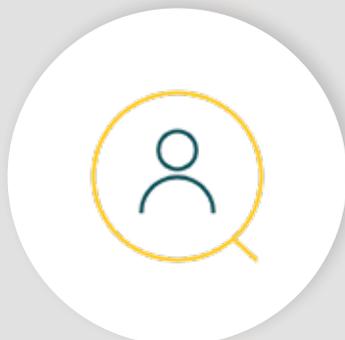

Attractive conditions
of trade cooperation

Guarantee and complaint
support

Rich selection of training
courses

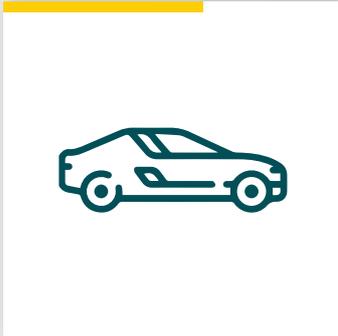

Flexible and individual
customer approach

Maintaining long-term
relationships

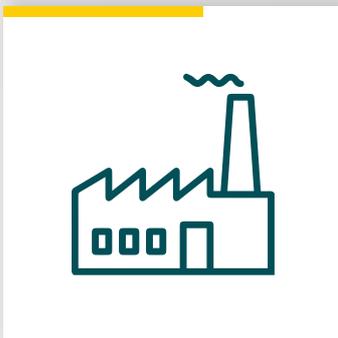

Operating business segments

Troton offers a wide range of refinishing products dedicated for the automotive, industry and boatbuilding sectors.

AUTOMOTIVE

Automotive industry is Troton's main specialization, in which we have been successfully operating for more than 44 years. Significant experience in this field results in one of the most versatile product assortments in the refinish industry. We produce body fillers / putties, primers, clearcoats, basecoats, thinners, resins, aerosols, removers, adhesive products, underbody conservation products and acrylic paints.

INDUSTRY

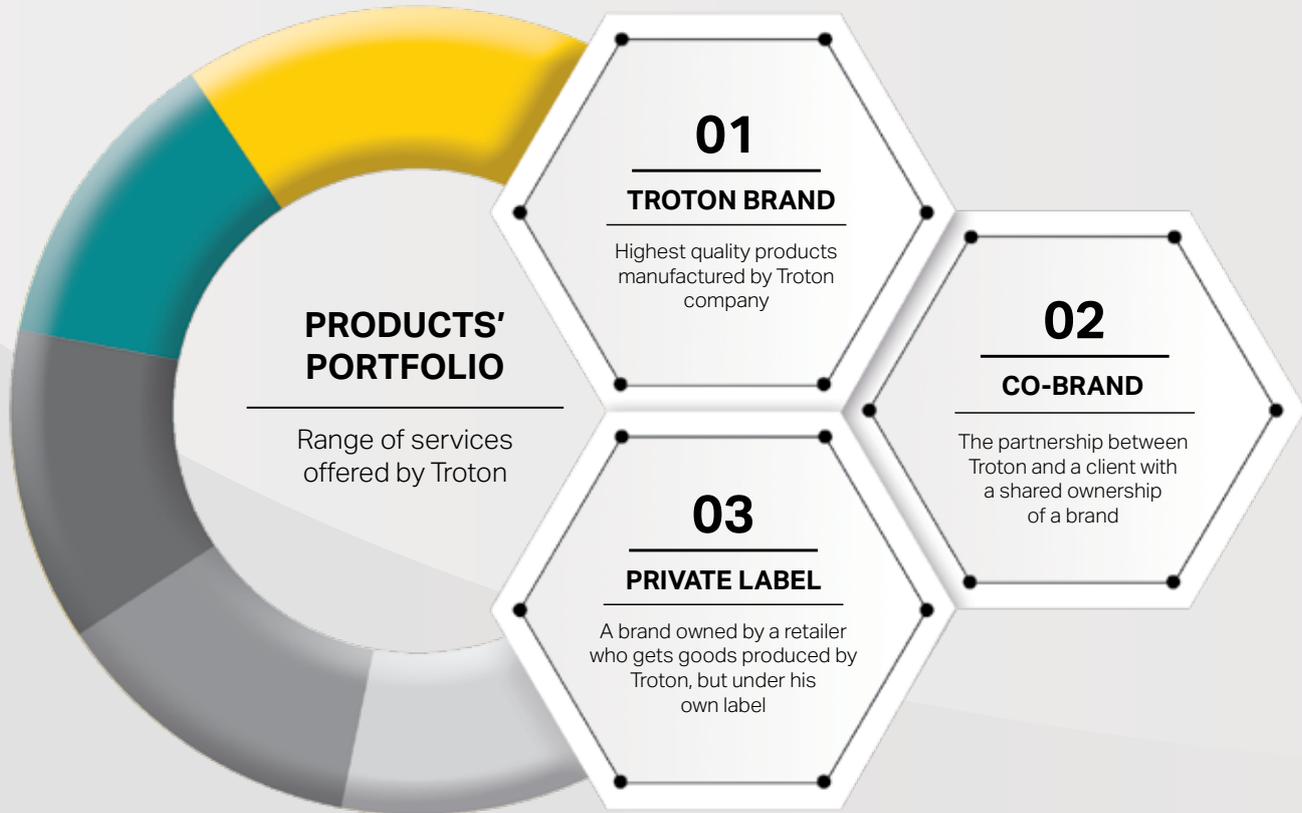

Individual approach is important in the industrial sector like in no other. Our well-developed R&D and technical department provide maximum compatibility with the most complicated industry projects offering our clients the best solutions. Main branches in industry we specialize in are: furniture, railroad, steel-metallurgical, machine and decorative industries.

BOATBUILDING

We provide a complete system of yachting paints, polishing compounds and materials useful in every stage of building, repair and conservation of boats. A wide range of products is our main asset. Amongst them, you will find long-lasting paints dedicated for the most luxurious watercrafts, specialist functional and economical ones. Our offer is targeted at both amateur hobbyists, boatbuilding plants and shipyards.
